ALS is a progressive neurodegenerative disease that affects a patients' ability to speak, eat, move and breathe. Currently, there is no cure or treatment and our focus remains on providing comfort care for the patient while helping them to experience the best quality of life possible. Your help is needed in making a difference in an ALS patient's life. Please join us to learn how you can learn more about ALS, become aware of the realities that ALS patients and their caregiver face, while also learning how you can assist and support this unique population

Class size is limited and RSVP is required
